What I Did

- Audited content-moderation decisions for policy compliance and provided final quality validation on escalated cases.
- Led calibration sessions with Quality Analysts, Operations, and client Quality teams to align policy interpretation and cut scoring variance.
- Ran root-cause analysis on metric deviations, then partnered with Training and Operations on targeted quality refreshers.
- Designed and monitored weekly KPI dashboards to catch accuracy fluctuations before they compounded quarter over quarter.

Impact

- Raised average accuracy from 97.02% (2023) to 98.86% (2024) across 8–9 queues — a personal-best year, not a one-quarter spike.
- Hit 100% quarterly target attainment in Q1 2024 and Q4 2024, up from 50% in Q1 2023, while the accuracy bar was raised mid-year.
- Sustained accuracy at or above the 96% KPI baseline for 8 straight quarters (Q3 2023–Q2 2025).
- Results recognized with a Top 2 APAC ranking and the Q4 2024 APAC Top Performer award.
